

COMPANY PROFILE

*"Bringing You
Advanced Technology"*

FALAH
INOVASI TEKNOLOGI

ABOUT COMPANY

PT. FALAH INOVASI TEKNOLOGI is a dynamic, innovative and creative company that preside in Defence Industry for Virtual Reality Technology. We bring comprehensive amazing experience, break through the imagination, and provide advance solutions using state of art technologies.

The company is lead by the CEO Mrs. Noviyana and Commissioner Mr. Deni Darodjat Muslim. The commissioner of the company graduated cum laude in Computer Science from Binghamton University in New York, USA, and has more than 15 years of experience in Telecommunication, Software Development, and Simulations.

F

Focus

Accuracy

We create product
with high accuracy

H

High Tech

We provide high
technology system

OUR VISION

*"Be The **Best Innovative Technology** Company in Southeast Asia"*

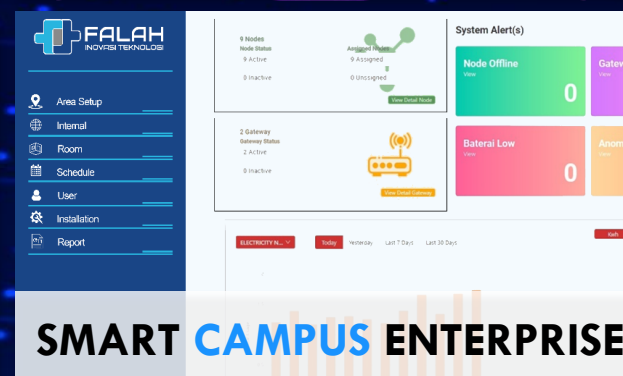

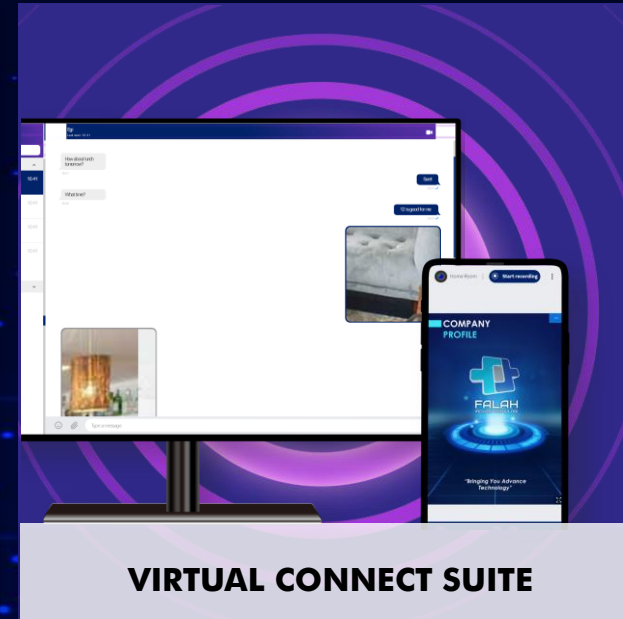

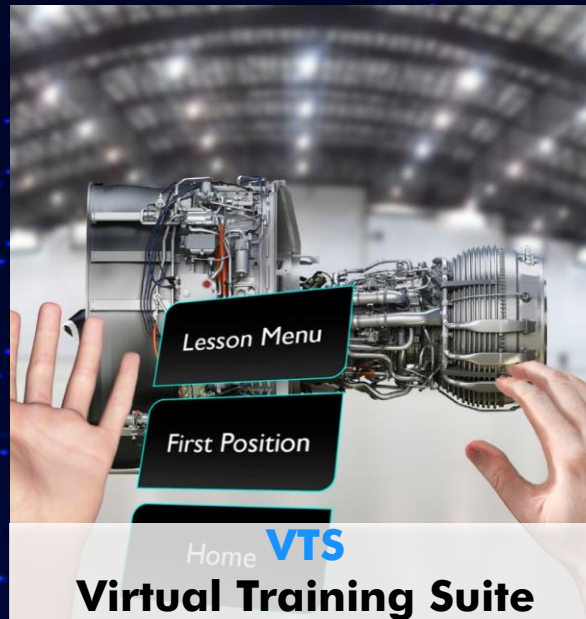

OUR MISSION

- Treat our customers with trust, responsibility and respect
- Build a professional engineering team with extensive knowledge and experience
- Provide outstanding technology infrastructures, services, and solutions

OUR BUSINESS

PT. Falah Inovasi Teknologi will transform our clients business ideas into successful solutions that can meet their business needs and contribute to their business success. We focus on building application software and creating content according to needs. Supported by the latest technology and professional team, we are committed to creating system that is easy to use, high tech and sustainable.

OUR PRODUCTS

VTS (Virtual training suite) is a multifunction platform with advance technology, and ideal solution that can create immersive, and high accuracy training experience.

VTS is a multifunction education platform for training with benefit

- Innovative Training
- Accelerated & Effective Learning
- Immersive & Realistic Experience
- Optimization Learning
- Focus & Free Distraction
- Improves Retention & Recall

F-16 Maintenance Training

VTS f16 uses 3 kinds of platform which are Desktop, VR, and Android. VTS creates "Technical Order" into digital learning that is easy to understand. Available F16 modules are:

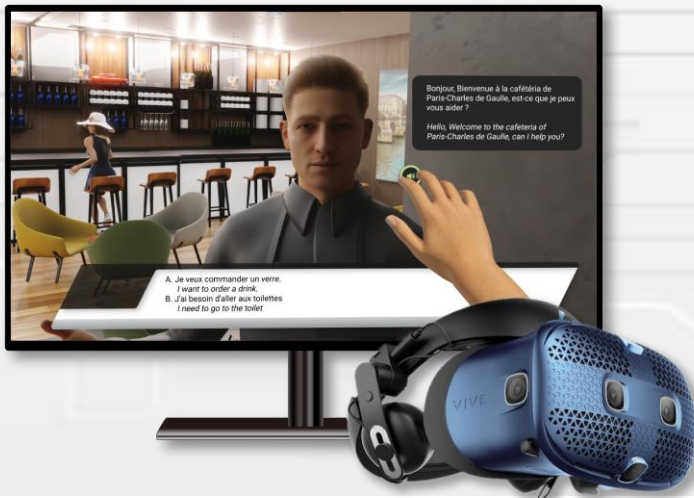

- Airframe
- Electrical System
- Emergency System
- Fuel System
- Environmental System
- Oxygen System
- Crew Escape System
- Hydraulic System
- Pneumatic System
- Power Plant System
- Armament System

Language Training

VTS Language uses voice recognition technology and virtual reality. VTS enables user to interact with 3D environment and NPC. VTS is able to detect spoken words. Available VTS Language modules are:

- Bahasa Module
- English Module
- Arabic Module
- Germanic Module
- French Module
- Korean Module
- Russian Module
- Mandarin Module
- Japanese Module

F-16 Operational Training

VTS F16 Operational Training provides interactive procedures on how to start a plane before lift off. VTS reduces cost in training, chances of accidents, and any damage on the plane because personnel does not need to physically test out the plane. Available Operational F16 modules are:

- Mode I After Cockpit Check Is Complete – Verify
- Mode II Before Starting Engine
- Mode III Starting Engine
- Mode IV After Engine Start
- Mode V Before Taxi

CN235 Maintenance Training

VTS CN235 Maintenance Training transforms “Maintenance Manual” from text and pictures into a visual learning method using 3D models and videos. VTS is equipped with an exclusive computer and virtual reality gadgets. This VTS contains modules of the following:

- Air Conditioning System
- Auto Flight System
- Communications System
- Electrical System
- Fire Protection System
- Flight Control System
- Fuel System
- Hydraulic System
- Power Plant System

AS565 Maintenance Training

VTS AS565 Maintenance Training modernizes student learning by using 3D media and Video, making it easier to understand and more effective. VTS is equipped with an exclusive computer and virtual reality gadgets. This VTS contains modules of the following:

- Communication System
- Electric Power System
- Fire Protection System
- Fuel System
- Hydraulic System
- Main Rotor System
- Rotor Flight System
- Power Plant System

VTS VIRTUAL TRAINING SUITE

OPV Class Ship Operational Training

OPV Class Ship Operational Training contains high level of immersion that enables user to explore the 3D ship which is equivalent to an actual ship. User is able to see the engine room, electrical and even crew cabins in the form of 3D.

JeniusAR implementation with a learning approach about everyday life. AR content is presented in the form of **3D models, 3D animation, and sound.**

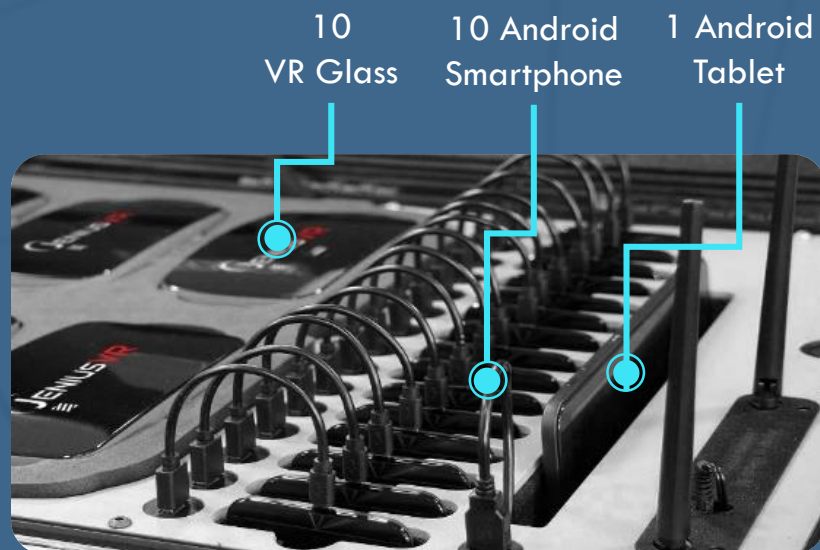

Convert 2D books into 3D and keep people engaged by incorporating interactivities.

Give an access to AR content by downloading the JeniusAR app on smartphones/tablets and scanning the marker on the books.

JeniusVR is a platform developed by PT Falah Inovasi Teknologi to improve education quality. This platform can make the students more interest in teaching and learning process. JENIUSVR can provide learning optimization, and very effective to help teachers in the teaching and learning process. JeniusVR platform is implementing Virtual Reality Technology that integrated with educational tools kit.

Smart Class With capacity of 10 students & Using Education Curriculum K13 Indonesia

1 License Teacher & 10 License for student

Application

- Content Management System
- Learning Management System
- Integrated with Smart Class System

Devices

- 10 VR Headset
- 10 Android Smartphone
- 1 Android Tablet
- 1 Wifi Router
- 1 Exclusive Box

Smart Campus Enterprise is the most complete integrated Academic Information System application for universities or educational institutions

Academic Management System

- Student Examination System Feature
- Student Registration System Feature
- Payment Gate Away System Feature (host to host and virtual account)
- Academic Information System Feature
- FEEDER Dikti Information System Feature

Community Management System

- Scholarship Information System Feature
- Tracer Alumni Information System Feature

Executive Report Management System

Resource Management System

- Administration Information System Feature
- Budgeting Information System Feature
- Employee Information System Feature
- Finance Information System Feature
- SKP and BKD Information System Feature

Knowledge Management System

- E-Library System Feature
- Research Information System Feature
- Plagiarism Information System Feature

SMART CAMPUS ENTERPRISE

Mobile App
Smart Campus

Information Center and Community in Your Hand

VISITOR MANAGEMENT SYSTEM

Visitor Management with E-KTP & Face Recognition

Visitor Management System is a technology that tracks visitors in the designated place. All forms of visits will be recorded by this technology and tracked any time.

- Face Matching Module with E-KTP data
- People Tracking Report and Guest History Report
- E-KTP Reader Module
- Integrated E-KTP Reader

ENERGY MONITORING SYSTEM

Energy Monitoring System is a web based application that monitors energy usage in a building

- Location Area
- Schedule Editor
- User Editor
- Report

SMART CLASSROOM SYSTEM

Smart Classrooms are technology-enhanced learning classrooms that enhance digital teaching and learning. Classrooms are integrated with digital displays, tabs, whiteboards, hearing aids, and other audio / visual components that make lectures easier, more interesting and more interactive. Smart classrooms have smart applications that can help teachers provide lessons to students. Teachers can do learning management, conduct distance learning, and control each student in the class.

Smart Classroom Software

- Teaching Management System
- Classroom Management System
- Class Collaboration System
- Content Management System

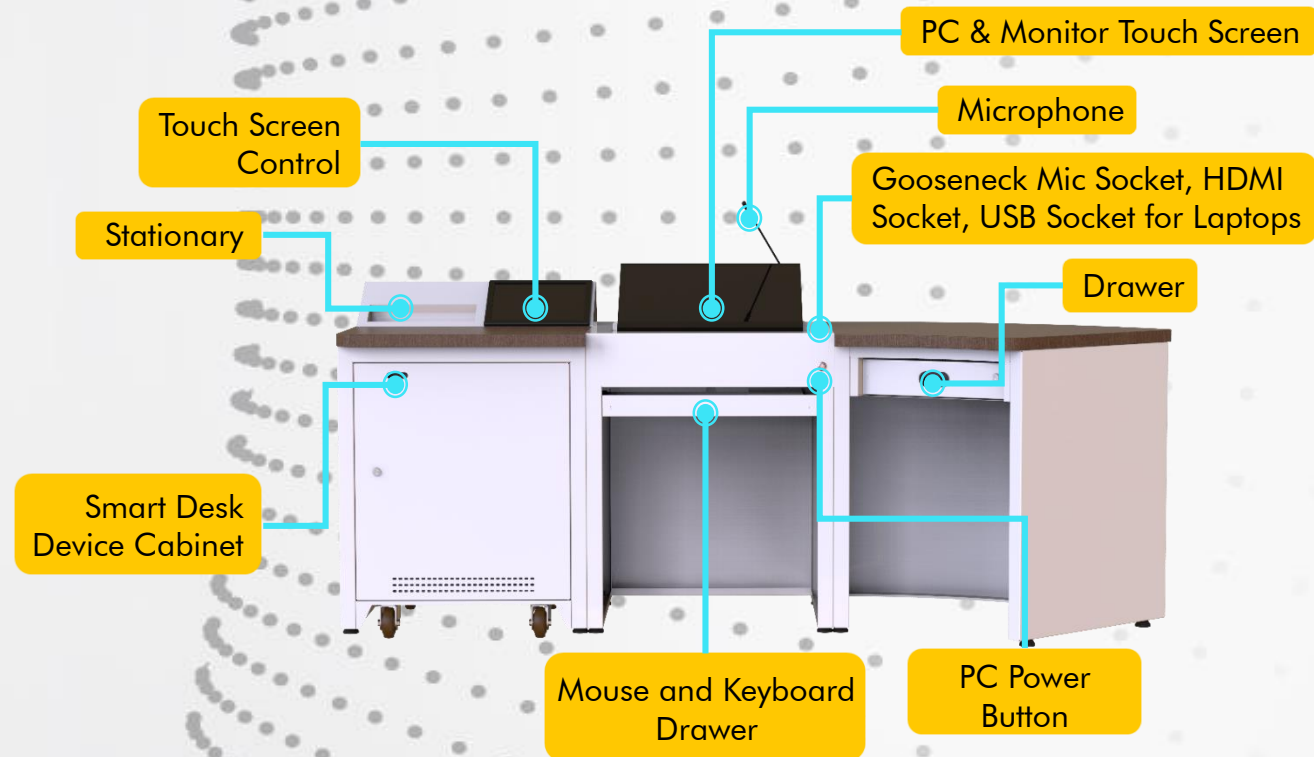

What's in a Smart Classroom?

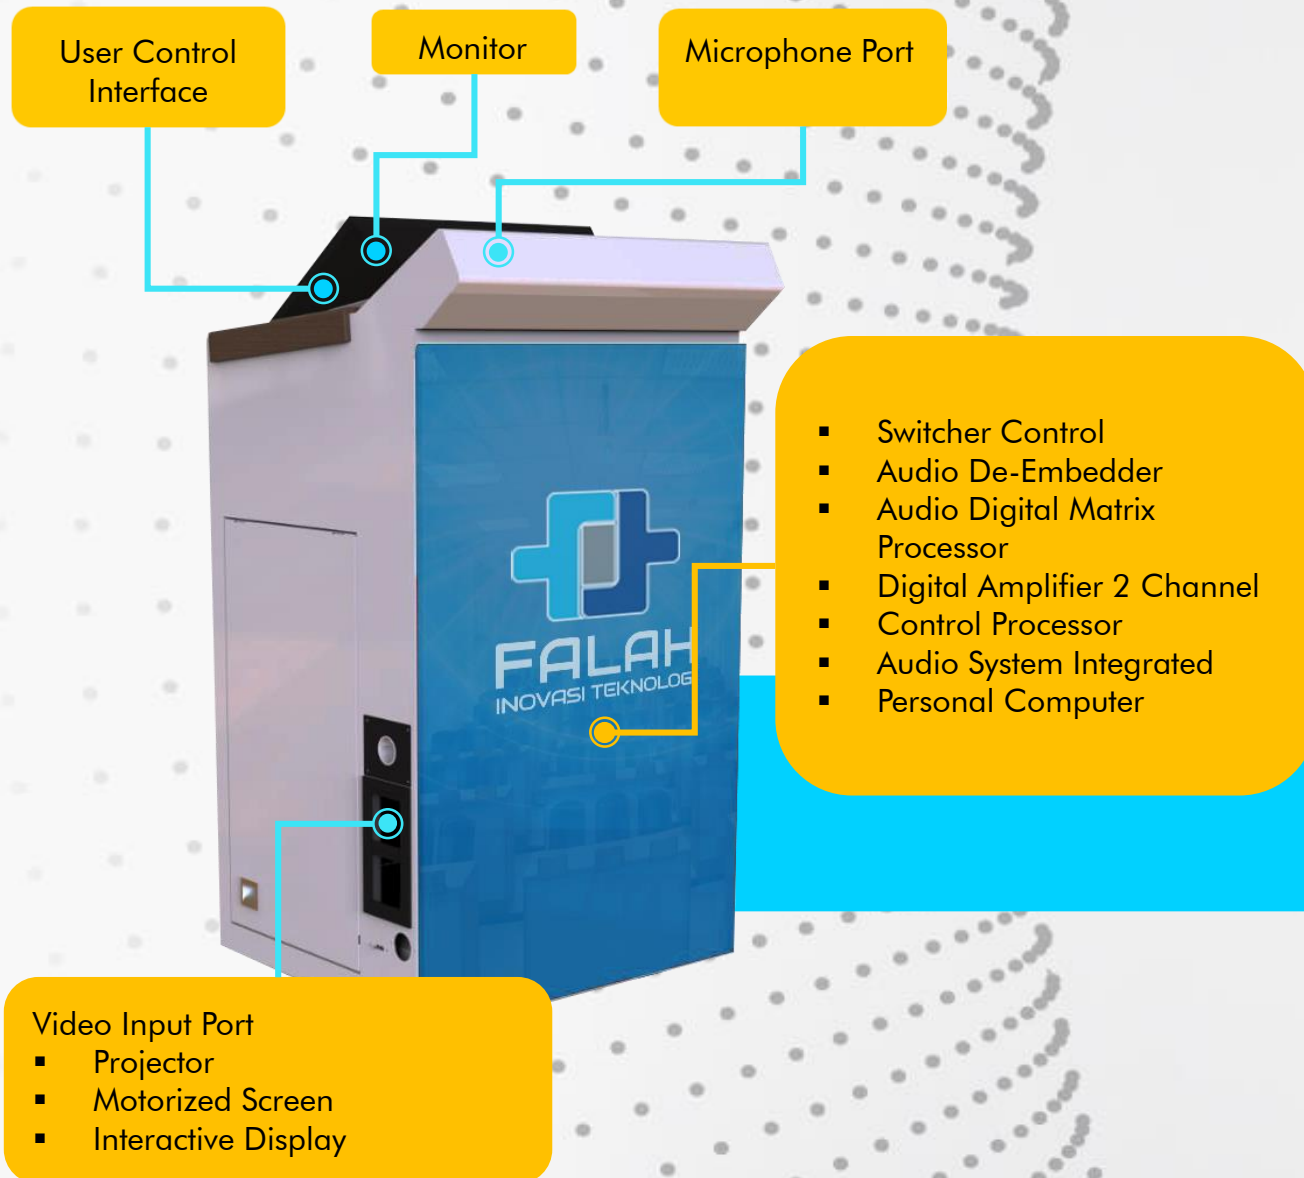

- Teacher assistant app
- Smart podium/Smart table
- Interactive display
- Audio
- Recorded camera
- Projector

SMART TABLE

Smart Table is a multifunctional table design to make it easier for teachers in class. Because the Smart Table has been filled with various devices that will make it easier for teachers when providing material to students, such as computer devices, projector, screens and interactive display controls.

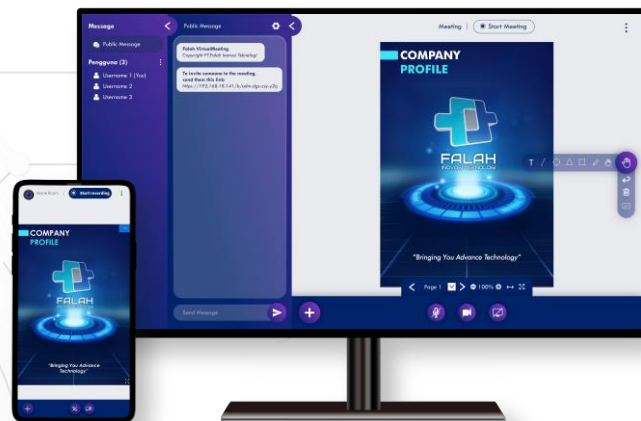

Smart Podium consist of systems devices and applications that play a role for control the audio visual system and connected with the web conference application and classes collaboration system.

VIRTUAL PILOT TRAINING

VPT (Virtual Pilot Training) is a simulation for beginner pilots to practice basic training. This simulation can be used for various aircraft, such as commercial, combat, and training aircraft. Virtual Pilot Training can integrate virtual Pilot Training with the motion platform. Before driving a real plane, basic pilots are trained first through Virtual Pilot Training, which aims to see the feasibility of a pilot before going to a real aircraft. Virtual Pilot Training can be in the form of a computer base or FTD (Flight Training Device) that resembles a real airplane cockpit.

Features

- Full flight deck and cockpit replica
- Real or replicated A/C parts
- Simulated or A/C avionics
- Control loading system on all flight controls
- Flight management system (rehosted FMS), full autopilot, flight director and auto throttle
- Aircraft systems (electrics, hydraulics, pneumatics, etc.)
- User-friendly IOS
- Aerodynamic flight and ground model based on
- OEM data pack
- High definition collimated display system
- Advanced image generator including WWDB
- Worldwide FMS navigation database
- Fully automated QTG tool
- Circuit breaker doors
- Fully Electrical 6DOF Motion System

Benefit

Comprehensive and effective experience is offered with a realistic control system for main and auxiliary flight controls and an option package including pilot seats.

Technical Specification

- Pre-flight Procedure
- Take-Off & Departure
- Inflight Manoeuver
- Instrument Procedures
- Approach & Landing
- Normal/Abnormal Procedures
- Emergency Procedures
- Post Flight Procedures

Military

- Ability to create and modify a wide variety of military aircraft, with a high fidelity flight model.
- DIS networking support.
- Multiple seat support (for example, pilot and co-pilot configuration).
- Comms support over DIS network.
- Configurable sensor suite, including IR/EO camera support, A/A and A/G RADAR, SAR/ISAR.
- Configurable weapons system.

Commercial Aviation

- Ability to create, modify or purchase a wide variety of commercial aircraft, with a high fidelity flight model.
- DIS networking support.
- Multiple seat support (for example, pilot and co-pilot configuration).
- Comms support over DIS network.

Search and Rescue/Law Enforcement

- High fidelity helicopter flight model.
- Ability to create, modify or purchase a wide variety of commercial aircraft.
- DIS networking support.
- Multiple seat support (for example, pilot and co-pilot configuration).
- Comms support over DIS network.
- Configurable sensor suite, including IR camera support.

VIRTUAL HELICOPTER PILOT TRAINING

Virtual Helicopter Pilot Training offering a low-cost helicopter simulation control platform that is modular and re-configurable meaning that users can add a variety of instrument panel modules, visuals, aircraft-specific cyclics and collectives etc.

Virtual Helicopter Pilot Training is an innovative and affordable new type of helicopter simulator targeted at training pilots in all kinds of ways external sling loads. Many pilots have cited that they wished there was such a product when they were learning how to long line.

Features

- Full immersion in the cockpit with the ability to look around (including directly down for vertical reference / long lining operations)
 - Modular and reconfigurable (aircraft-specific modules and controls can easily be added / interchanged) including main instrument panels, avionics suites, GPS etc.
 - USB "Plug and Play". Can be used with a variety of software platforms dependent on the training requirement
 - Cyclic has force trim function
 - Pedals have high quality hydraulic dampening
 - Collective has high quality hydraulic dampening and friction control
 - Robust and deployable. Main frame has durable Rhino Coating with recessed, rugged handles for easy movement. Internal parts over-engineered to withstand the harshest of operating environments
 - Small footprint. Can fit in a small office, trailer or shipping container and is entirely portable
 - Package deals with PC, configured software and virtual reality headset available
 - Motion platform available
- 
- Adjustable seat
 - Can also be used with LCD screens or projectors for the out-the-window visuals instead of / as well as the virtual reality or mixed reality headset
 - Scalable
 - Cost-effective / affordable
 - Excellent backup and support
 - Shipping worldwide

VIRTUAL PARACHUTE TRAINING SYSTEM

Virtual Parachute Simulator, which enables parachute training personnel to perform jump procedures and emergency methods in a simulated environment before jumping from a real aircraft, maximizes the success rate of the mission. This feature can display an emergency condition when parachuting; if there is a problem, it can be identified in this Virtual Parachute Training. In addition, Virtual Parachute Training can control weather conditions, conditions such as morning and evening, wind speed, and direction.

This system has a High Altitude Low Opening (HALO) parachute that can be opened to an altitude of 1,500 Feet and a High Altitude High Opening (HAHO) parachute that can be extended to a height of 1,500 Feet and closed at an altitude of 20,000 Feet.

Parachute Simulator is an advanced simulator that developed by applying its experience in simulation, and software. Offering the closet experience to real action.

Features:

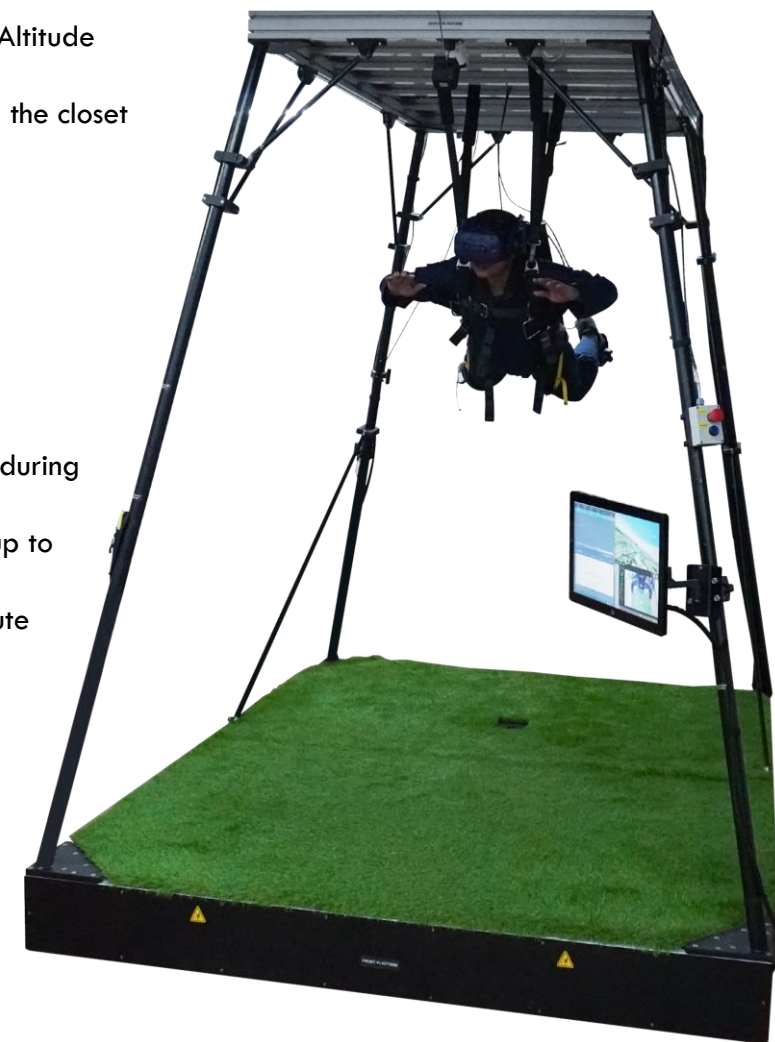

- Wind, rain, and snow simulation
- Day, and night jump simulation
- Support equipment simulation
- Jump point symbology simulations
- Emergency, and malfunction entry before or during the flight
- Ability to perform HAHO, and HALO jumps up to 30,000 feet
- Realistic aerodynamic mathematical parachute models
- 3D modeled parachute failures

Benefit:

- Training support with static and tactical parachutes
- Individual and team training
- Free fall and maneuvering training
- Emergency and malfunction training
- Training opportunity in a safe and controlled environment
- Maximizing security awareness of staff
- Continuous follow-up and evaluation of the staff participating in the training, making the analysis more effective
- Elimination of practical training deficiencies
- Training opportunities against changing conditions and new situations.

Technical Specifications

- Wind, rain and snow simulation
- Day and night jump simulation
- Support Equipment simulation
- Jump point symbology simulations
- Emergency and malfunction entry before or during the flight
- Ability to perform HAHO and HALO jumps up to 30,000 feet
- Realistic aerodynamic mathematical parachute models
- 3D modeled parachute failures
- Record / replay the jump
- Detailed reporting after the jump
- Realistic terrain images
- Instructor station
- Modular structure
- Self test
- Multi language support

SHOOTING SIMULATOR

Personnel who will take training for the first time should practice their aiming techniques in a training environment before using real ammunition. The trainings can be given in the classroom environment without using ammunition, but with these methods, a real shooting feeling cannot be provided and the experience of using binoculars cannot be gained. In order to acquire the necessary abilities, snipers must shoot with real bullets at 1 km² polygons. This causes the relevant training to be expensive and it requires to take wide security measures in shooting ranges.

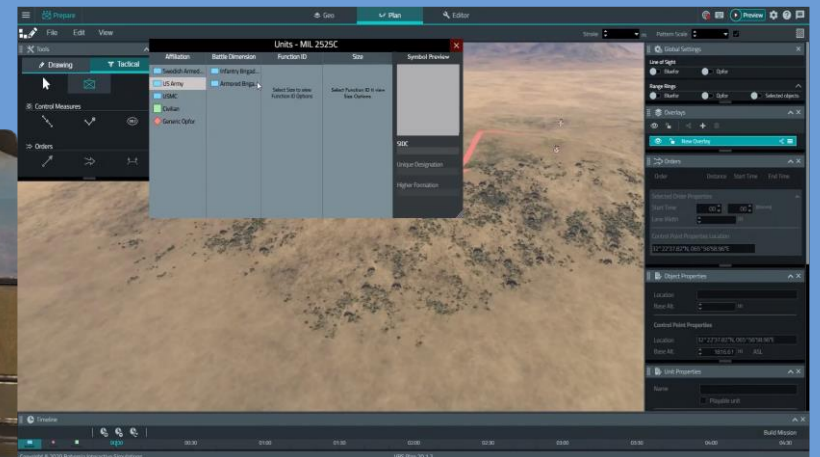

Technical Specifications

- Realistic 3D images
- Real weapon integration
- Special binoculars option
- 3-12x binocular instrumentation
- Micro Display and related optics
- Environmental conditions that can be customized, controlled and changed
- Scenario based training with game engine
- All kinds of terrain conditions and LOS analysis
- Real binocular integration
- Standalone design
- Producing and recording scenarios
- Meteorology simulation
- Computer controlled powers
- 100-1200 meters training distance
- Distance estimation training using MilDot-scop

WAR GAMING

War Gaming is a desktop-based war training simulation that is carried out in a classroom, the instructor will create a training scenario that will be played by the students. In training, students can become individuals in a group who are obliged to follow the direction of their commander or become a commander in a group that will organize war strategies for their group. The results of the training can be seen in the after action review in the debrief mode.

- Whole-Earth data and supports training at any location on the virtual globe.
- Mission planning capability allowing users to quickly draw tactical plans in 2D and 3D and then execute those plans with high-fidelity AI.
- Allows users to import, create and modify terrain. The interface supports collaboration and enables users without formal training to quickly and easily edit terrains.

VERTICAL WIND TUNNEL

A **vertical wind tunnel** is a wind tunnel which moves air up in a vertical column. It is a recreational wind tunnel, frequently advertised as "indoor skydiving" or "bodyflight". It is also a popular training tool for skydivers. Vertical wind tunnels enable human beings to fly in air without planes or parachutes, through the force of wind being generated vertically.

FLYING CHAMBER

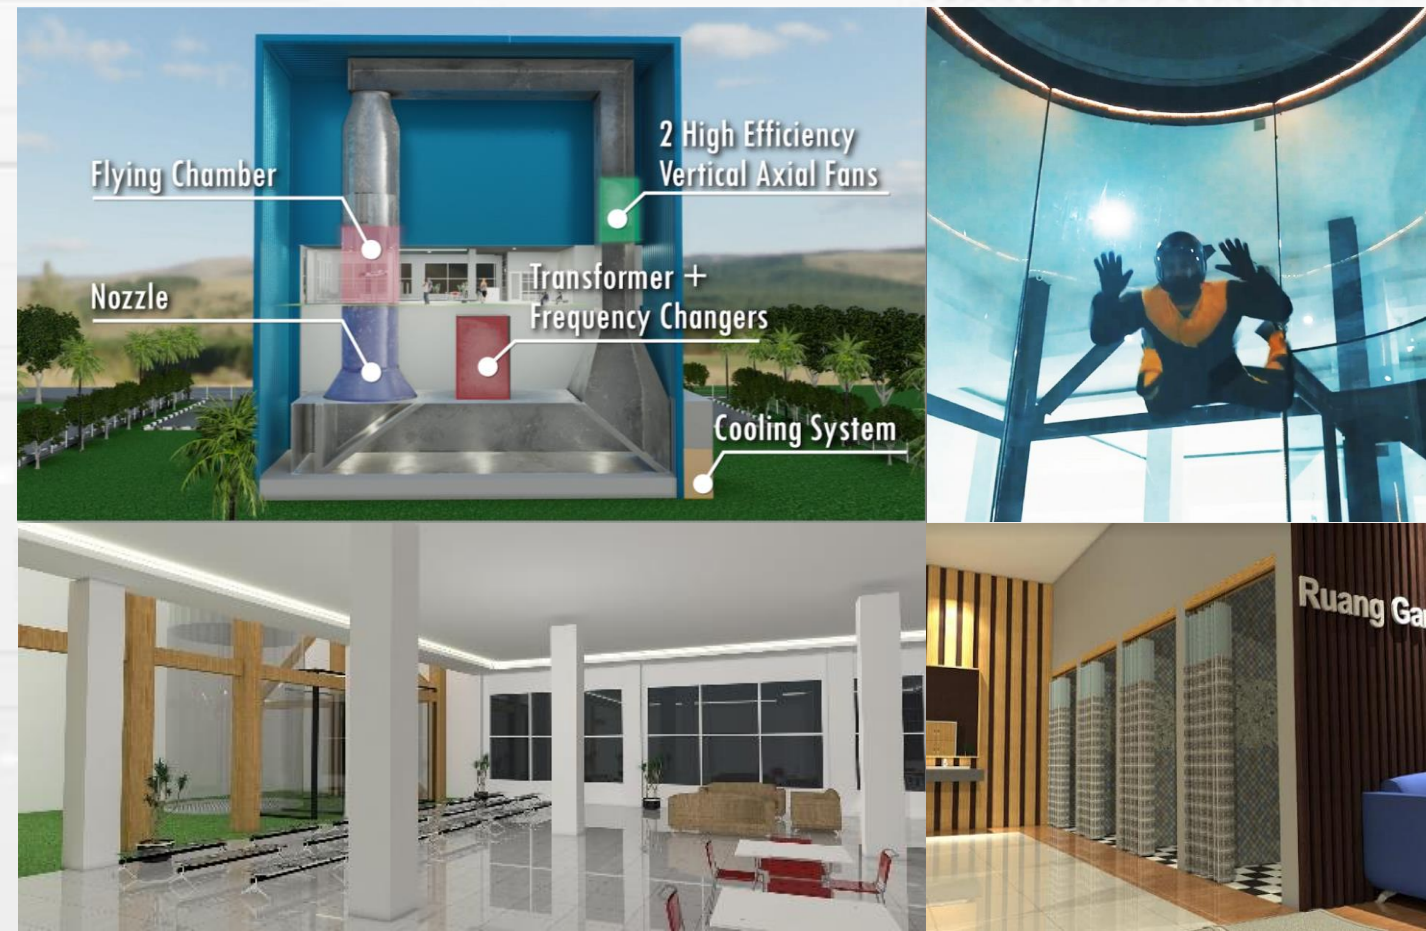

- Frameless clean circular shape
- Hardened glass
- Chamber diameter 2.8, 3.2, 3.6, 4.3, 5.0, 5.2 m
- Overall height – 14-18 m
- Maximum speed – 280+ km/h

WIND TUNNELS NOZZLE

- Glass fiber composite
- FEM structure optimized
- CFD flow optimized
- Very general and optimized shape and size ensures perfect flow conditions in the flying chamber

WIND TUNNELS FANS

- Located vertically in returning
- Adjustable blades angle
- Low speed design
- Solid aluminum blades
- Not fragile when hit by flying elements
- Save kinetic energy when disconnected power

OUR JOURNEY

SERTIFIKASI MUTU INDONESIA

CERTIFICATE OF REGISTRATION

This is to certify that

PT. FALAH INOVASI TEKNOLOGI

Jl. Mampang Prapatan raya No. 17, Blok. K, Kel. Mampang Prapatan,
Kec. Mampang Prapatan, Kita Adm. Jakarta Sekatan, Provinsi DKI Jakarta - Indonesia

Which complies with requirements of

SNI ISO 9001:2015 QUALITY MANAGEMENT SYSTEM

Scope of certification

**Provision of Trading of Machines, Other Equipment and Supplies,
Computers and Equipment, Software Development, Textiles, Clothing and
Footwear.**

Initial Assessment : June 09th 2020
Certification Date : July 09th 2020
Surveillance 1 : June 09th 2021
Surveillance 2 : June 09th 2022
Certificate Expiry Date : June 08th 2023

Certification Number : 369-QR-200709
Client ID Number : 369
EA Code : 29

Zakaria Simbolon
President Director

Registration is subject to management system and continually maintained to above standard through regular surveillance. When surveillance does not take place as required, registration will be removed. To verify and validate of this certificate please contact our phone number: +6221-84590625 or through our website : www.sm-indonesia.com
This certificate is the property of PT. Sertifikasi Mutu Indonesia, Jl. Bambu Apus Raya, Blok G, No:6, Cipayung, Jakarta Timur, Indonesia 13820, and must be returned upon request.
